

Amaram Technology Corp is an SBA 8(a) certified SDB IT Consulting company. Amaram is a prime contractor on the GSA 8(a) STARS II GWAC and the Seaport-e rolling admissions contract vehicle with the Department of Navy. Amaram also holds BPA's with the National Institutes of Health BPA and the Pension Benefit Guaranty Corporation. Amaram is a sub-contractor on GSA ALLIANT GWAC and the the Defense Medical Information System/Systems Integration, Design, Development, Operations and Maintenance Services(D/SIDDOMS) III.

### **Technical Capabilities:**

**Content Management Systems:** Web Content Management has become essential for organizations in today's era of Internet being used as a strategic channel. We provide the ability to maintain ones website and publish compelling content with ease through a host of open source content management tools and development platforms. We will ensure that you will lower your operational costs significantly while giving you optimal control over publishing processes. We project a strong focus on new and emerging technologies to keep our clients ahead of time with our expertise in Drupal, Joomla, Wordpress, Percussion, PHP with experience implementing LAMP and WAMP platforms.

**IT Governance & PMO Support:** We apply Project Management Body of Knowledge (PMBOK) strategies to ensure project success for our customers. We structure and ensure successful project completion through a combination of our proven PM methodologies, technical experience, PMBOK and expertise. We facilitate implementation of complex technology solutions quickly and efficiently, through our technical project management experts who oversee these implementations, and minimize risks inherent in IT projects. Project derailment usually caused due to insufficient communication, improperly defined expectations, or scope creep are effectively managed and recovered using PMBOK strategies to bridge the gap between business customer and technology solutions team, a key parameter to our success. A thorough understanding of the business need and the technological challenges of meeting that need allows us to mediate between business, IT delivery, and third party vendor teams. Communicating, documenting and negotiating scope, time and cost throughout the implementation ensures expectations are correctly established and successfully met.

**Cloud Services:** Cloud computing comes into focus only when you think about what IT always needs: a way to increase capacity or add capabilities on the fly without investing in new infrastructure, training new personnel, or licensing new software.

Our focus is to Provide Cloud as a Service, simplify adoption to cloud; take the complications out of cloud adoption, Promote the advantages of Cloud Computing – the key drivers for Cloud Computing, develop ROI's of moving to Cloud environment, analyze existing Infrastructure and Services and recommend strategies for moving to Cloud, analyze customer requirements and design and architect solutions for moving to Cloud , analyze existing services and recommend different cloud types that provide best value to the customer: Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS), evaluate different cloud options per service, design cloud solutions based on Customer Security Requirements, design flexible solutions which are a combination of different cloud types, design and architect Virtual Data centers, design and

implement Public Clouds, design and implement Secure Public Clouds, design and implement Enterprise Private Cloud, design and implement Enterprise Hybrid Cloud, Agile Cloud Deployment:

Deploy clouds in an agile manner in small increments, Integrate Cloud Deployments across IT Lifecycle (ITIL), Vendor Agnostic, Implement solutions to secure cloud environments, Design solutions and implement monitoring of cloud environments, Follow Security certification requirements. FISMA, NIST, etc, Design cloud based solutions to streamline application development and deployment across software SDLC, Partnership with Cloud Providers and Cloud software providers, Build Cloud Management dashboards for capacity planning and visibility: Performance, Availability, Capacity, Growth Rate Develop self service portals so und users can consume cloud services efficiently, Integrate with Enterprise workflow production for Cloud Provisioning, Evaluate Cloud providers based on requirements and Develop Cloud Adoption Framework

**Oracle Federal Financials:** We have worked with numerous Federal clients implementing and supporting Oracle Financials. We have professional consultants on board with direct experience implementing Oracle Financials specifically for the Federal government. Our technical expertise includes a thorough understanding of the intricacies working with Oracle Financials in a Federal environment to help our partner agencies meet financial system and reporting requirements including clean audit opinions. We have provided clients with functional and technical expertise in all Oracle modules, legacy data conversion, interface development, end user support, training, financial statement preparation, and operational support.

**Custom Application Development:** Our Software Development model includes, writing of requirements based specifications that allows development of applications with the functionality & behavior of systems to be separated from implementation details. We are experts in Microsoft Technologies, Java Platform and conversion of legacy systems to either of these, through Service Oriented Architecture (SOA) as well as other conventional and modern methods. Expertise in Microsoft technologies includes .Net, C#, ASP, Windows, COM, VB, to name a few. Our expertise in MS Technologies is used to create “Best value” for clients through enterprise solutions maximizing our clients’ overall enterprise performance and technology investment. Expertise using the Java Platform include J2EE, Core Java, EJB, Swing, Struts, JSP, Junit to name a few. We simplify enterprise applications, using standardized, modular components, by providing a complete set of services, to handle details of application behavior automatically, without complex programming.

**Quality Assurance/ IV&V:** We provide for cost effective approaches for independent software assessment by top QA SMEs through Competencies that span areas of Software Engineering, Testing, Test Automation, Performance Testing, IV&V (Independent Validation & Verification), Software Quality Assurance, IT Audit – SOX Compliance, Systems Integration, Mercury Interactive, Rational & Other tools to include Clear Case, Clear Quest, Win Runner, Load Runner etc. We follow the NASA model for our IV&V processes.

**Data Management Services:** We provide reliable and expert services in implementing highly optimized analytical systems to handle the most challenging data warehousing requirements with ease. Our offerings include solutions to meet client demand for business intelligence, advanced analytics, data mining, predictive modeling and executive reporting. Our expertise spans data security, data warehousing, apart from Data Management & Analysis. Technology and tools include IBM Data Stage, Informatica, Ab Initio, Micro Strategy, SAS, Oracle, DB2 UDB, SQL Server, My SQL, MS Access and MS Excel

**Mobile Application Development:** We provide a host of cutting edge mobile applications for different industry verticals to include aviation, real estate, network solutions, retail, automobile, media and entertainment, healthcare and petro. The applications have been developed for a variety of mobile devices and platforms including iPhones, blackberry, iPad and droid. Some of the applications include app for airline ticketing, marketing app for media advertising, app for medical transcription etc.

**Clients:** FDA – Bethesda, MD, NCI–NIH Bethesda,MD, Montgomery County – Rockville, MD, Fannie Mae – Washington, DC, SSA – Baltimore, MD, Freddie Mac – McLean, VA, GSA HQ – Washington, DC, DoEd. – Washington, DC, Federal Election Commission, Washington, DC, Marriott Hotels – Bethesda, MD, Verizon Business - Columbia, MD, World Bank – Washington, DC, Advance Auto Parts – Roanoke, VA

**Core Competencies by NAICS:**

- 518210** - Data Processing, Hosting, and Related Services, **541511** - Custom Computer Programming Services
- 541512** - Computer Systems Design Services , **541519** - Other Computer Related Services
- 541611** - Administrative Management and General Management Consulting Services
- 541618** - Other Management Consulting Services, **611420** - Computer Training
- 611430** - Professional and Management Development Training
